SIMULACRUM RULE BOOK

Currents'19 presents to you, SIMULACRUM, a circuit based matlab simulation event. Participate in the event and show your skills using Simulink to grab prizes worth 8k.

Simulacrum is a matlab simulation event where participants have to analyse a given circuit and make it less redundant using Simulink.

1. The event consists of two rounds- the prelims and the finals. Participants who will qualify the prelims will go to the finals. Level of complexity of the finals will be more.
2. The event is a team event with each team consisting a maximum of two people.
3. Each team is required to bring at least one laptop with the MATLAB software pre-installed.
4. Judging criterion: Circuit with the least number of components will be awarded.
5. Judges' decision is final.
